VoiceMOS Challenge 2026 Track 3 Data

This data was jointly created by the National Institute of Information and Communications Technology (NICT) and Wen-Chin Huang (Nagoya University), and ownership belongs to both parties. NICT and Wen-Chin Huang (Nagoya University) grant permission to use this data under the following conditions:

Description: The data provided consists of synthesized speech samples in various accent varieties of English, along with their human-annotated ratings for quality and degree of match to the target speaker identity and accent. This dataset consists of three sets: a training set, a development set, and an evaluation set.

Conditions: This data is provided for use in the VoiceMOS Challenge 2026 Track 3 only. Redistribution of this data, or its use for any other purpose, is strictly prohibited. You must agree to these conditions in order to be granted access to the data.

Warranties: The End User warrants that they are authorized to enter into this agreement, and that they have read and understood all the terms contained herein and that the signature apposed hereunder is a fully informed decision. The licensor shall not be liable for any damages incurred by the data user as a result of using the data.

End User: I agree to the above.

Organization name (Institute, University, etc.): _____
